

Fast Bucks

Fast Bucks is an interactive experience that allows everyone who plays, a chance to win money or prizes while drawing traffic and attention. **Fast Bucks** is as much fun for observers as it is to play.

Fast Bucks machines can be used for trade shows, business grand openings, fund raisers, corporate events, radio stations, the rental industry and more to promote their business or ideas.

Fast Bucks can be used to blow cash, paper money, vouchers, certificates or any paper product. Winnings are controlled by variable time settings in the money machine, denomination of cash or value of certificates, and amount of cash or certificates in the machine.

Usually about 100 notes are inserted into **Fast Bucks** machines made up of mostly one dollar value certificates. Larger notes can be mixed within the machine to increase perceived value and excitement of playing the game.

Rules do not allow players to pick up notes below their knees or to trap money with their body against the machine wall. They may catch only airborne notes.

All contestants must wear safety glasses and exit when directed to. Player handicaps such as wearing obscuring glasses, using only one hand or having to stuff winnings in a pouch or pocket can extend the amount of time players can be in the machine.
